

# Farm Bill Wildlife Biologist Quarterly Partners Report

Hallie Uhlig — Mills, Fremont, Montgomery, and Page Counties

October - December 2022

## Learning the Ropes

Throughout my first quarter with Pheasants Forever, I have spent a good deal of time meeting landowners and producers with my peers in an effort to observe the steps to providing assistance and building relationships with landowners. These landowner interactions have greatly increased my appreciation for conservation on private lands as I have had the pleasure of working with

landowners who are passionate about conservation and eager to put wildlife habitat on their land. I have been lucky to meet one specific landowner who has been seeking out advice for an Environmental Quality Incentives Program contract for brush management and a pollinator seeding. This landowner has made it clear to us that his goal is to create wildlife habitat for his children and grandchildren to enjoy in the years to come. I have found in these first few months that it is a privilege to work with landowners like this who

are committed to these long-term projects. I look forward to continuing to provide assistance to landowners like this to help them reach their conservation goals!

Above—EQIP Plan for brush management and pollinator habitat.

Left—One of the 30 status reviews I conducted, this is a CRP filter strip between a small creek and a corn field, I saw multiple pheasants in the field at this location!

**Thank you so much for your support! Without this partnership, I wouldn't be able to provide assistance to landowners and positively impact conservation in Iowa!**
